

Eric's Heritage tips of the month

Tip #1: Stripping paint from metal hardware

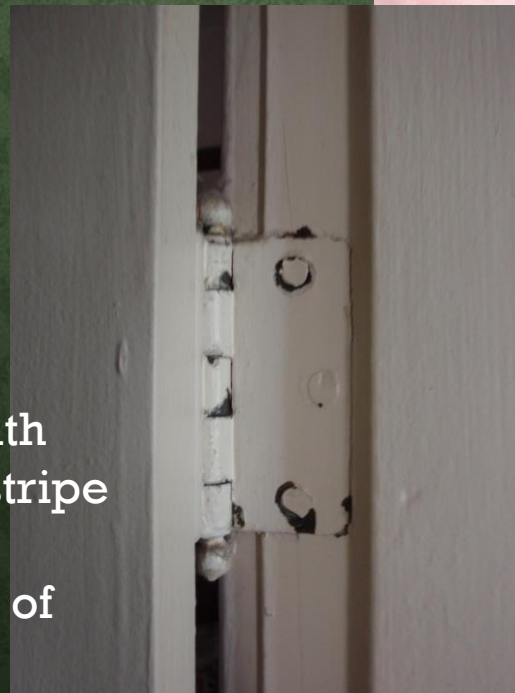

Furnace damper control

Brass hinges
from medicine
cabinet

Steel hinges with
original tiger-stripe
patina under
multiple layers of
white paint

Baking soda + hot water + dedicated slow cooker + ~3 hours

- Caution: Paint likely contains lead!
- Don't use the slow cooker for other cooking!

- Strip one type of metal in each batch
- Check during stripping to preserve original patina
